Community Health at your fingertips.
The new Community Health mobile app for practitioners.

Our new easy to use web and smart phone app provides essential community health service telephone numbers and information at your fingertips. A single point of information to a range of frontline community health staff. Saving time and improving outcomes.

Key features
- Search using patient’s postcode or name of patient’s registered GP.
- Select Service in your area.
- Provides right number, first time every time - no wasted calls.
- Simplified access to professional to professional advice.

Expected outcomes
- Aids effective co-ordination between different professionals and departments.
- Supports busy clinicians in practice, on the move or in hospital settings.
- Enables patients, carers and families to have their health and care needs met in the most appropriate healthcare setting.
- Provides information about how to access intermediate care and additional community health seasonal resources.
