

West of Scotland Lung Cancer Webinar

WHEN: Wednesday 28th April 7pm – 8.30pm

WHERE: Microsoft Teams, link to follow

The impact of COVID-19 on cancer outcomes is likely to be profound with around **25% fewer lung cancers** being diagnosed since the onset of the pandemic.

This webinar will provide valuable insights into the importance of earlier diagnosis of lung cancer. The interactive session will include practical guidance about presenting symptoms, referral pathways, and investigations through to the point of diagnosis.

We welcome all primary care and pharmacy staff to [register](#)
