

SCI GP Maternity Referrals

Women in pregnancy should be self-referring via the Central Booking Office (**CBO 0141 347 8422**) and following the phone call and appointments being booked the CBO staff send a SCI information request to the GPs requesting information on relevant medical conditions and or social history etc.

We have reviewed SCI Gateway Obstetric referrals in all sites in GGC, see chart below. I appreciate that there will be a few occasions when a SCI referral is required, for example, when the GP considers the women needs an urgent early appointment with an obstetrician, but would be grateful if GPs could be encouraged and supported to use the CBO.

Please see a summary of the GP SCI referrals , as you can see these have reduced following the circulation of the above previous communication and guidance on the use of Central Booking Office.
