The aim of the webinar is to update practitioners on the current guidance and support for managing people with allergies in relation to COVID-19 vaccination.

Topics being covered

- Allergies in relation to COVID 19 vaccines
- What constitutes anaphylaxis?
- Guidance on how to manage people with allergies within the context of the COVID 19 Vaccination Programme
- Anaphylaxis - retrospective history gathering assessment
- The data that requires to be collected to support escalated discussion on cases

Frequently asked questions during the webinar will be answered by a panel of experts.
