

Dear Colleagues,

I am a medical student working with the General Paediatric Team at the Royal Hospital for Children. I am working on a project with one of the consultant paediatricians - Dr Owen Forbes with the main aim of surveying primary care colleagues to see how they feel the new Medical Paediatric Telephone Triage service for acute referrals has been working.

As you may know, at the beginning of the pandemic a consultant led phone line - the Medical Paediatric Telephone Triage Service - was established in RHC in order to triage acute referrals of paediatric patients to the hospital.

We would appreciate some feedback as to how well you feel this service does or does not work for primary care and would be grateful if you could spend a couple of minutes completing this survey.

Thank you in advance.

James
4th year medical student at the University of Glasgow
