

## Flu Vaccines in Primary Care

### Unused/Unwanted Flu Vaccine

If you still have flu vaccine in your fridge, which you are not going to use, you can remove it and store at ambient temperature. Please do not discard this unused and unwanted vaccine as the board usually receives a rebate on unopened packs. **Clearly label it 'not suitable for use'** and lock in a cupboard.

Unfortunately, we cannot arrange for Movianto to uplift this stock at present as they are at a full capacity delivering Covid vaccine.

Flu Returns and uplift arrangements will be communicated in due course.

### Accessing Flu Vaccine

The NHSGGC Adult Flu line – 0800 707 6699 is now closed as is the Adult Flu email box. All calls should be directed to the NHS Inform national flu helpline 0800 22 44 88

Any adults who are still looking for a flu vaccine can be directed to a participating community pharmacy. A list of participating community pharmacies is detailed on both the NHSGGC website and NHS Inform website.
